NABIL HUSAM DAWUD

Software Engineer — Backend / Full Stack

Gaza, Palestine | nabeeldawud@gmail.com | +972 59 286 4425 | nabil-dawud.vercel.app | github.com/NabilDawud | linkedin.com/in/nabil-dawud

SUMMARY

Computer Systems Engineering graduate (91.44%, "Excellent") with hands-on backend experience developing REST APIs in Laravel — building a multi-tenant ERP platform for humanitarian organizations and the API behind a cross-platform mobile productivity app. Comfortable owning a feature end to end: data modelling, authentication and authorization, third-party and AI integrations, and automated tests. Selected for two competitive 2026 backend training programs and currently completing IBM's Back-End Developer certificate.

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript, TypeScript, Python, Java, C
- **Backend:** Laravel, REST API design, JWT, OAuth 2.0, Laravel Sanctum, Spatie Permissions, Eloquent ORM, custom middleware, events & listeners, queues, rate limiting, Artisan commands
- **Frontend:** Next.js, HTML5, CSS3, Tailwind CSS, JavaScript, Bootstrap, Blade
- **Databases:** PostgreSQL, MySQL, SQLite — schema design, migrations, relationships, constraints, soft deletes
- **Testing & Tools:** PHPUnit (feature & unit), Git & GitHub, Postman, Composer, npm, Laravel Pint, Dokku
- **Integrations & AI:** Google Gemini API (structured JSON output), Google Identity / OAuth ID-token verification, Resend transactional email
- **Concepts:** MVC, SOLID, service layer & dependency inversion, multi-tenancy, RBAC, modular architecture, event-driven design, API resources, offline-first design

PROFESSIONAL EXPERIENCE

Backend Developer — Orbit (Team Project)

BBD Select — Back End Development Track

May – Jul 2026 | Gaza (Remote)

Collaborated in a five-person cross-functional team (2 UX/UI, 1 front-end, 2 back-end) developing the Laravel 13 / PHP 8.4 REST API powering a Flutter mobile app.

- **Project Scope:** Collaborated on shipping 56 REST endpoints across 10 domain models (tasks, goals, milestones, habits, habit logs, focus sessions, categories, reminders, transactions, users), backed by 20 migrations with record-ownership enforcement.
- **Authentication:** Individually implemented four authentication paths — stateless JWT, Google Sign-In with server-side ID-token verification, code-based email verification, and password reset — each rate-limited against brute-force attacks.
- **AI Integration:** Integrated Google Gemini behind a swappable MilestoneSuggestionProvider interface without touching controllers, using a strict JSON schema to turn free-text goals into ordered, actionable milestones.
- **Focus Engine & Analytics:** Engineered focus sessions with pause/resume cumulative time accounting and single-active-session constraints; delivered insights endpoint computing productivity scores from task completion, habit streaks, and focus-session counts.
- **Automated Testing:** Authored feature test suites covering JWT authentication, Google sign-in, email verification, password reset, avatar upload, and AI milestone generation.

Backend Developer — MASAR (Humanitarian Operations & ERP Platform)
TAQAT Foundation — CodeMap 2026 Internship & Active Ongoing Development
Jun 2026 – Present | Gaza
Backend engineer developing a modular ERP system tailored for humanitarian and NGO workflows. Stack: Laravel, PostgreSQL, Next.js, Flutter.

- **Implemented Core Modules:** Modeled normalized relational schemas and developed modular REST APIs for TaskWorkflow (task delegation, internal orders, activity logs, polymorphic comments/attachments) and ModuleManagement screen permissions.
- **Tenancy Governance (Implemented):** Enforced multi-tenant data isolation using Laravel Sanctum, Spatie Permissions, anti-enumeration 404 boundaries, and audit logging with recursive PII redaction.
- **Onboarding & Architecture (Active Development):** Actively engineering the organization onboarding approval pipeline with automated notifications; advancing idempotent module auto-provisioning driven by domain events.

ACADEMIC & FEATURED PROJECTS

- **Mishwar** — Offline-first transit network & private charter platform. Independent build in Laravel 13, PHP 8.4, FrankenPHP, MapLibre GL JS, Dokku. Client-cached route-graph trip planning (offline), real-time corridor fleet tracking with freshness timestamps (online), driver bidding workflows, and Dokku CI/CD. meshwar.apps.taqat.academy · github.com/NabilDawud/meshwar
- **University Issues Management** — Al-Hams Training Course Project. Hierarchical student grievance management system in Laravel 13 & MySQL with dynamic category forms (form_data), Spatie RBAC, and transactional status transitions with assignment audit logging. github.com/NabilDawud/University-Issues
- **Apartment Maintenance Marketplace** — Arabic-first multi-role maintenance web platform built with Next.js 16, TypeScript, Better Auth, Prisma ORM, and PostgreSQL. Role-specific views and ticket lifecycle for owners, tenants, and technicians. apartment-maintenance-marketplace.vercel.app · github.com/NabilDawud/apartment-maintenance-marketplace
- **Additional Repositories:** Charitize (Laravel charity platform — github.com/NabilDawud/Charitize) · Atom (Laravel portfolio app — github.com/NabilDawud/Atom)

EDUCATION

Bachelor of Engineering, Computer Systems Engineering — Al-Azhar University, Gaza | Jun 2026

Cumulative Average **91.44% — "Excellent" (Honors)** | 162 credit hours completed | Graduation Project I (98/100) & II (97/100)

Tawjihi (General Secondary Certificate), Scientific Stream: **99.1%** — 1st in class

Relevant coursework: Software Design, Advanced Software Engineering, Database Systems, Web Engineering, Distributed Systems, Operating Systems, Computer Networks, Information Security, Artificial Intelligence, Software Testing.

CERTIFICATIONS

- **Professional Training Program in Back End Development** — BBD Select (BBD Agency), Jul 2026 · ID BBD-BE-7QZ3-P33Y
- **CodeMap 2026** (144 hours) — TAQAT Academy, Jul 2026 · ID TQ-2026-00114
- **IBM Back-End Developer Professional Certificate** — Coursera *(in progress: 6 of 11 courses)*, Apr 2026 – Present
- **Master Microsoft Excel: Beginner to Expert All-in-One Course** — 4 Excel Courses in One — Udemy, Kyle Pew (in progress: 204 of 372 lessons completed)
- **Additional Training — Anthropic:** Claude 101 — Claude Code 101 — Claude Code in Action — AI Fluency: Framework & Foundations — Building with the Claude API — Introduction to Model Context Protocol — Introduction to Agent Skills — Introduction to Subagents — AI Capabilities and Limitations.
- **Web Development Training Diploma** (230 hours) — Al-Hams Training Center, 05 Mar 2023 – 17 Jun 2026
- **Web Development Fundamentals** (40 hours) — Sprints, Sep 2025
- **Freelance Skills Training** (30 hours) — DigiWork Project (GIZ / Leaders International)
- **Artificial Intelligence and the Engineer of the Future** — Engineers Syndicate, Gaza Branch, Apr 2026
